

In the large picture we have a complete hinge and a subassembled. The measurements are 2" X 2" folded open.

In the top left hand picture we have all the cut off pieces. Destroy the ones with the X on them.

In the bottom left hand picture we have put the new "Blank" loose together. Drill at least one small hole to fasten the shaft of the brass headed blank.

Arnold

This key is made from Brass pieces.
Found in our brass collection box for
recycling. Except for the head.
The total length is 6 7/8".
